

Client-side web development

Web Applications Development

IES San Vicente 2026/2027

Rosa Medina

rmedina@iessanvicente.com, rm.medinagomez@edu.gva.es

Introduction

- *Client-side web development* is a 6 hours per week module.
- This module is focused on client-side web development technologies and distributed in 2 units/blocks.
 - JavaScript is the fundamental language of client-side web development.
 - We'll also learn TypeScript (a superset of JavaScript).

Unit 1 - JavaScript

- **Main contents**
 - JavaScript (ECMAScript 2015 version) basics
 - Object Oriented Programming in JavaScript
 - BOM and DOM, Events, AJAX
 - Geolocation and Local Storage APIs
 - Node Package Manager (NPM) basics
 - Vite
 - TypeScript

Unit 2 – Angular

- **Main contents**

- Angular projects. Angular client.
- Components.
- Templates, interpolation and directives.
- Data binding. Pipes. Signals.
- Services. Dependency injection.
- Web services with Http Service and resource APIs.
- Navigation and routing.
- 3rd party modules. Capacitor.

Schedule

Unit	Weeks	Period	Trimester
1 - JavaScript	9-10	Sept/Nov	First
2 – Angular	9-10	Nov/Feb	Second

Evaluation

- Each unit will have some small exercises or project milestones (10% evaluation mark)
- At the end of each unit a project should be delivered (30%).
- After a project's delivery there will be a test to check your knowledge about the unit and your project (60%).
 - You must get at least a 5 in the project's grade to take the test.
 - You must get at least a 5 in the test grade to pass the assessment.

Evaluation

Each evaluation grade calculation

Exercises	10%	
Unit project	30%	≥ 5
Unit test	60%	≥ 5

Final grade calculation (≥ 5 in each unit)

Unit 1	50%
Unit 2	50%

What if a fail in an exam/project?

- If the evaluation ends and you haven't reached the minimum mark in something (first or second evaluation), you'll have another opportunity in the ordinary call (June).

Ordinary call (June)

- In June, any failed project needs to be delivered again (there can be modifications or even new projects).
- Any failed test will have to be retaken again
- At the end of the second trimester you will be informed what you should do in order to pass in June.

Methodology

- **All materials will be uploaded/linked in Aules Platform**
 - <https://portal.edu.gva.es/aules/>
- **Written materials and exercises will be in English. Solutions must be provided also in this language.**
- **Participation in class and “Aula Virtual” forums counts, at least to round your mark up or down at the end. Participation in forums must also be done in English.**
 - Don't be afraid of your english level, it won't be taken into account (participation is the most important matter)
